Statement of Comparison of Budget and Actual Amounts

Budget on Accrual Basis				
Figures in Rand thousand	Approved budget	Adjustments	Actual amounts on comparable basis	Reference

1. Property rates

Property rates is over budget as a result of change in the market value of existing properties and also the increase in new property registrations.

2. Services charges

Service Charges - Electricity

The actual result is under budget by 9%.

Service charges are less than the budget due to a decrease in kilowatt-hour's sold.

3. Investment revenue

Group Annual Financial Statements for the year ended 30 June 2019

Statement of Comparison of Budget and Actual Amounts

Budget on Accrual Basis					
	Approved budget	Adjustments	Actual amounts on comparable basis		Reference
Figures in Rand thousand				actual	

The positive variance is as a result of interest charges on outstanding debtors. This is consistent with the lower payment levels of old debt. This is also attributable to favourable cash balances thorought the financial year.

4. Other Revenue

4.1 City Power

The other revenue is over budget as a result of the Demand Service Levy. City Power which is 14% over budget in this line.

4.2 Pikitup

The city cleaning levy is over budget due to the implementantion of the new general valuation roll and the tariff increase effective 01 July 2018. City cleaning levy is linked to property values.

5. Debt impairment

Allowance for impairment is over budget due to the increase in debtors not collected. The contribution towards the Provision for bad debts was higher than anticipated and this is as a result of poor payment levels which are currently below the budgeted payment levels of 85%, customers are continuing to default in their current and old debts.

6. Depreciation and armotisation

Depreciation is under budget due to assets under construction being completed later than anticipated.

7. Other expenditure

7.1 Core departments

The general expenses is under budget due to expiry of the repairs and maintenance contract for which the procurement process for the new contract is in progress

7.2 Water

The under expenditure in General expenditure is mainly due to the disaster management fund which was originally budgeted for as required by CoJ's Disaster Management Services unit but no claims were submitted.

7.3 City Power

Repairs and maintenance are less than the budget due to the following:

- 1. Delays in procurement processes for HV and MV Switchgear maintenance service providers.
- 2. Delays in securing meter maintenance contracts for Metering Services.
- 3. Low expenditure incurred by Engineering Services on a labour contract that was delayed during tender processes and it has recently been approved

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1. Statement of compliance

Basis of Preparation and Presentation

The Annual Financial Statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the Municipal Finance Management Act (MFMA) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The Annual Financial Statements have been prepared on an accrual basis of accounting and are in accordance with the historical cost convention unless specified otherwise.

Presentation Currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

Going Concern

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

Comparative information

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.1 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.2 Consolidation

Basis of consolidation

The consolidated Group Annual Financial Statements comprise the Annual Financial Statements of CJMM and all entities controlled by CJMM, presented as those of a single entity.

Control exists when CJMM has the power to govern the financial and operating policies of another entity so as to obtain benefits from its activities.

Balances, transactions, revenues and expenses between entities within the Group are eliminated in full on consolidation.

1.3 Significant judgements and sources of estimation uncertainty

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Significant judgements include:

Impairment of financial assets

Where objective evidence of impairment loss on financial assets measured at amortised cost exists, the present value of the future cash flows of the financial assets discounted at the financial asset's original effective rate is determined and compared to the carrying value of the financial assets. The carrying amount of asset shall be reduced either directly or through the use of an allowance account. The amount of loss shall be recognised in the statement of financial performance.

Allowance for slow moving, damaged and obsolete stock

Management makes an estimate of the selling price and direct cost to sell to determine the net realisable value of inventory items. Allowance for obsolete stock is recognised when stock is slow moving and/or will not be used. The difference between the cost of inventory and the net realisable value is recognised in the statement of financial performance.

Fair value estimation

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price. Where there is no active market, fair value is determined using valuation techniques. Such valuation techniques include using recent arm's length market transactions, reference to current market values of other similar instruments, discounted cash flow analysis and option pricing models.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the group for similar financial instruments.

Impairment of property, plant and equipment

The Group assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Municipality then estimate the recoverable service amount of the asset.

The recoverable amounts of cash-generating units and individual assets are determined based on the higher of value in use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the fair value assumption may change which may then impact estimations and may then require a material adjustment to the carrying value of cash-generating units and individual assets.

The excess of the carrying amounts over the recoverable amount is recognised as impairment loss in the statement of financial performance.

Provisions, contingent liabilities and contingent assets

Management's judgement is required when recognising and measuring provisions as well as contingent liabilities and contingent assets. Provisions are raised based on the information available to management, and past knowledge.

A provision is recognised when the municipality has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, and the amount of the obligation can be reliably estimated.

Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect is material.

The estimates are discounted at a discount rate that reflects current market assessments of the time value of money

Expected manner of realisation for deferred tax

Deferred tax is provided for based on the expected manner of recovery, i.e. sale or use. This manner of recovery affects the rate used to determine the deferred tax liability.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The group recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the group to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the group to realise the net deferred tax assets recorded at the end of the reporting period could be impacted.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost/(income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The group determines the appropriate discount rate at the end of each year. This is the interest rate used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the group considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainties.

Impairment of receivables

Impairment of receivables represent management's best estimate based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments. This is performed on each category of debtors across all debtor classes.

Useful life of PPE

The useful life of assets are based on management's estimates. Management considers the impact of technology, service requirements and the required return on assets to determine the optimum useful life expectation, where appropriate. The estimated residual value of assets is also based on management's judgement which takes into account the condition of assets at the end of their useful lives.

Budget information

For differences between budget and actual amounts management considers the amount and the nature of the difference and makes a judgement as to which differences are regarded as material. All material differences are explained in the notes to the annual financial statements.

1.4 Zoo animals

Zoo animals are accounted for in terms of GRAP 17 as items of property, plant and equipment. The majority of animals are received as donations and transfers from other similar institutions for no consideration or from procreation. These assets are recorded at a fair value at the time of donation or transfer, and are depreciated accordingly.

Market determined prices or values are not available for certain animals due to lack of market because they are not commodities, as well as restrictions on trade of exotic animals which precludes the determination of a fair value. The fair value of livestock is determined based on market prices of livestock of similar age, breed, and genetic merit.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.4 Zoo animals (continued)

The Johannesburg Zoo also acquires animals through supply chain processes and these newly acquired animals are carried at cost less accumulated depreciation and any impairment losses. The offspring of newly acquired animals shall be recorded at a fair value at the time of birth and will also be depreciated accordingly.

The useful lives of zoo animals listed below reflect useful lives of the different classes of animals at the Johannesburg Zoo. Within the different classes of animals are a number of different species whose useful lives differ. Therefore the useful lives of zoo animals listed below reflect the useful lives of the different species contained within a specific class of animals.

The longevity of zoo animals has been assessed as follows:

Amphibia	4-16 years
Arachnida	2-20 years
Aves	4-6 years
Mammalia	6-64 years
Pisces	1-35 years
Reptilia	7-80 years
Insecta	4 years

1.5 Investment property

Investment property is recognised as an asset when and only when it is probable that future economic benefits or service potential that is associated with the investment property will flow to the entity and the cost or fair value can be reliably measured

Investment property is initially measured at cost. Transaction costs are included in the initial measurement.

Subsequent measurement

Under the cost model, investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Investment properties, with the exception of land, are depreciated on the straight-line basis over their expected useful lives as follows:

Item	Useful life
Property - Buildings	30 years
Property -Land	Unlimited

The useful life and the depreciation method for investment properties are reviewed at each reporting date.

Investment properties are tested for impairment whenever there is an indication that the asset may be impaired.

Transfers to, or from, investment property shall be made when, and only when, there is a change in use.

Derecognition

An investment property is derecognised upon disposal or when it is permanently withdrawn from use, and when no future economic benefits or service potential are expected from its use. Any gain or loss arising from the retirement or disposal is recognized in the statement of financial performance.

1.6 Property, plant and equipment

Property, plant and equipment is initially measured at cost.

All items of property, plant and equipment (PPE) are initially recognised at cost, which includes the purchase price and any costs directly attributable to bringing the assets to the location and condition necessary for them to be capable of operating in the manner intended by management.

Where an item of PPE is acquired through a non-exchange transaction, its cost is measured at fair value as at the date of acquisition.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.6 Property, plant and equipment (continued)

Subsequent measurement:

PPE are shown at cost, less accumulated depreciation and any accumulated impairment. Land is measured at cost, less any impairment in value and is not depreciated, since the useful life is considered to be indefinite.

Assets under construction are carried at cost. Depreciation of an asset commences when the asset is ready and available for its use as intended by management.

Property, plant and equipment with the exception of land are depreciated on the straight line basis over their expected useful lives to their estimated residual values. The depreciation method used for each asset reflects the pattern in which the asset's economic benefits or service potential has been expected to be consumed by the Municipality.

Assets held under finance leases are depreciated on the lower of lease term or expected useful lives in the same way as owned assets. When it is reasonable certain that ownership will be transferred to the lessee at end of lease term, then leased asset will be depreciated over the useful life of the asset which is consistent with that for depreciable assets that are owned. Depreciation is recognised in the statement of financial performance.

Subsequent expenditure is included in the cost of the asset when incurred, if it is probable that such expenditure will result in future economic benefits associated with the item flowing to the Municipality, and the cost can be measured reliably.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment and also depreciated separately.

The residual values, useful lives and depreciation methods applied to assets are reviewed at each financial year-end based on relevant market information and management consideration.

Property, plant and equipment are tested for impairment annually and whenever there is an indication that the asset may be impaired.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the depreciation period or method, as appropriate, and treated as changes in accounting estimates

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life (Years)
Buildings	18 - 60 years
Plant and Equipment	2 - 85 years
Furniture and fittings	2 - 25 years
Motor vehicles	3 - 20 years
Office equipment	2 - 20 years
Computer equipment	2 - 15 years
Bins and containers	5 - 10 years
Infrastructure	10 - 30 years
Community assets	3 - 30 years
Emergency Equipment	5 - 15 years
Wastewater and Water Network	, , , , , , , , , , , , , , , , , , , ,
Pump stations - Civil	60 - 100 years
Pump stations - Mechanical	5 - 15 years
Pump stations - Electrical	7 - 16 years
Water meters	4 - 13 years
Pipelines and other	60 - 100 years
Landfill Site	Determined annually
	based on the
	available space
Specialised vehicles	5- 40 years
Other	2 - 40 years

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.6 Property, plant and equipment (continued)

The gain or loss arising from the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value, and is recognised in the statement of financial performance.

The Group derecognises property, plant and equipment on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from derecognition of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the property, plant and equipment. Such difference is recognised in the statement of financial performance.

1.7 Intangible assets

An intangible asset is recognised when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the Municipality and cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost. Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Subsequent Measurement

Intangible assets are carried at cost less any accumulated amortisation and impairment losses.

Amortisation commences when the intangible assets are available for their intended use. The amortisation period and method for intangible assets with finite useful lives are reviewed annually. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates.

Intangible assets with finite useful lives are amortised on the straight-line basis over the useful lives of assets.

For intangible assets with an indefinite useful life, no amortisation is provided but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. However, the Municipality reviews the useful life of an intangible asset that is not being amortised each reporting period to determine whether events and circumstances continue to support an indefinite useful life assessment for that asset.

Amortisation is provided to write down the intangible assets, on the straight line basis, to their residual values as follows:

ItemUseful lifeAdditional capacity rights10 yearsServitudesIndefiniteComputer software, internally generated8 yearsComputer software2-8 years

By their nature, servitudes confer upon the holder a right in perpetuity over the property and as these rights have an indefinite useful life, they are not amortised.

1.8 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

A heritage asset shall be recognised as an asset if, and only if:

- (a) it is probable that future economic benefits or service potential associated with the asset will flow to the entity, and
- (b) the cost or fair value of the asset can be measured reliably.

A heritage asset that qualifies for recognition as an asset shall be measured at cost.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.8 Heritage assets (continued)

Where a heritage asset is acquired through a non-exchange transaction, its cost shall be measured at its fair value as at the date of acquisition.

Subsequent measurement.

Heritage assets are recognised at cost less accumulated impairment. Due to high residual values and long economic lives, the Municipality does not depreciate heritage assets

Transfers to heritage assets are made only when the asset meets the definition of a heritage asset, and transfers from heritage assets are made only when the asset no longer meets the definition of a heritage asset. Principles of assets transferred to heritage assets apply up until the date of transfer.

Heritage assets are tested for impairment annually and whenever there is an indication that the asset may be impaired.

1.9 Investments in Municipal Entities

In the municipality's separate annual financial statements, investments in municipal entities are carried at cost less any accumulated impairment

1.10 Investment in Joint Ventures

An investment in an joint ventures is accounted for using the equity method. Under the equity method, the investment is initially recognised at cost and the carrying amount is increased or decreased to recognise the group's share of the surpluses or deficits of the investee after acquisition date. The use of the equity method is discontinued from the date the group ceases to have joint control over an joint venture.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control.

An interest in a jointly controlled company is accounted for using the equity method, except when the investment is classified as held-for-sale in accordance with Standard of GRAP on non-current assets held-for-sale and discontinued operations. Under the equity method, interests in jointly controlled entities are carried in the consolidated statement of Financial position at cost adjusted for post-acquisition changes in the company's share of net assets of the company, less any impairment losses. Surpluses and deficits on transactions between the company and a joint venture are eliminated to the extent of the company's interest therein.

The most recent available annual financial statements of the joint ventures are used by the investor in applying the equity method.

Distributions received from the joint ventures reduce the carrying amount of the investment.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.11 Investment in Associate

An investment in an associate is accounted for using the equity method. Under the equity method, the investment is initially recognised at cost and the carrying amount is increased or decreased to recognise the group's share of the surpluses or surplus (deficit) of the investee after acquisition date. The use of the equity method is discontinued from the date the group ceases to have significant influence over an associate.

Any impairment losses are deducted from the carrying amount of the investment in associate.

Distributions received from the associate reduce the carrying amount of the investment.

Surpluses and surplus (deficit) resulting from transactions with associates are recognised only to the extent of unrelated investors' interests in the associate.

The excess of the group's share of the net fair value of an associate's identifiable assets, liabilities and contingent liabilities over the cost is excluded from the carrying amount of the investment and is instead included as revenue in the period in which the investment is acquired.

The most recent available annual financial statements of the associate are used by the investor in applying the equity method.

The recognition of the group's share of losses is discontinued once the group's share of losses of an associate equals or exceeds its interest in the associate.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.12 Financial instruments

Financial Assets

Financial assets consist of cash and cash equivalents, deposits, receivables and investments.

Financial assets other than those at fair value are assessed for indicators of impairment at the end of each reporting period. Impairment is considered when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

Financial assets are derecognised when the rights to receive cash flows from the assets have expired or have been transferred and the Municipality has transferred substantially all risks and rewards of ownership, or when the enterprise loses control of contractual rights that comprise the assets.

To the extent that a financial asset has a maturity period of longer than 12 months, the value of these instruments will be reflected as a non-current asset.

The classification of financial assets depends on their nature and purpose, and is determined at the time of initial recognition (trade date).

investments at cost

Financial assets at fair value

Financial assets at fair value comprise of derivatives and non-derivative financial instruments designated at fair value. On initial recognition the financial assets are measured at fair value. Subsequent to initial recognition, all changes to fair value are recognised through the statement of financial performance.

Cash and cash equivalents .

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

Receivables from exchange and non exchange transactions

Trade receivables and consumer debtors are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in the statement of financial performance when there is objective evidence that the asset is impaired.

Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable and consumer debtors are impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in the statement of financial performance within operating expenses. When trade receivables and consumer debtors are uncollectible, it is written off against the allowance account for trade receivables and consumer debtors once council approval is obtained. Subsequent recoveries of amounts previously written off are credited in the statement of financial performance.

Financial liabilities

Interest-bearing external loans and bank overdrafts are recorded net of direct issue costs.

Financial liabilities are initially recognised at fair value and subsequently measured at amortised cost, using the effective interest rate method, except for financial liabilities at fair value through profit or loss or hedging instruments, which are measured at fair value.

Finance costs on financial liabilities at amortised cost are expensed in the statement of financial performance in the period in which they are incurred using the effective interest rate method. In addition, gains and losses on these financial liabilities are recognised in the statement of financial performance when the liability is derecognised.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.12 Financial instruments (continued)

Gains and losses on financial liabilities at fair value through profit or loss arise from fair value movements and related transaction costs on these liabilities. These gains and losses are recognised in the statement of financial performance in the period in which they are incurred.

Financial liabilities are derecognised when the obligation specified in the contract is discharged or cancelled or when it expires.

Loans to/ from Municipal entities

Loans to/ from municipal entities are classified as Assets which are initially recognised at fair value and subsequently measured at amortised cost.

Payables from exchange

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Offsetting Financial assets and liabilities

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the municipality has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Hedge accounting (derivatives)

The municipality holds derivative financial instruments to hedge its interest rate risk exposures.

On initial designation of the derivative as the hedging instrument, the municipality formally documents the relationship between the hedging instrument and hedged item, including the risk management objectives and strategy in undertaking the hedge transaction and the hedged risk, together with the methods that will be used to assess the effectiveness of the hedging relationship. The municipality makes an assessment, both at the inception of the hedge relationship as well as on an on-going basis, of whether the hedging instruments are expected to be "highly effective" in offsetting the changes in the fair value or cash flows of the respective hedged items attributable to the hedged risk, and whether the actual results of each hedge are within a range of 80-125 percent. For a cash flow hedge of a forecast transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported statement of financial performance.

Derivatives are recognised initially at fair value, and attributable transaction costs are recognised in the statement of financial performance as incurred.

Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

Cash flow hedges

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect statement of financial performance, the effective portion of changes in the fair value of the derivative is recognised in other comprehensive income and presented in the hedging reserve in net assets. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in the statement of financial performance.

When a derivative financial instrument is not designated in a hedge relationship that qualifies for hedge accounting, all changes in its fair value are recognised immediately in the statement of financial performance.

1.13 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.13 Tax (continued)

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting surplus nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable surplus will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting surplus nor taxable profit (tax loss).

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in surplus or deficit for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to net assets; or
- a business combination.

1.14 Leases

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessor

Group recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the group's net investment in the finance lease.

Finance leases - lessee

The Group recognises assets and liabilities acquired under finance leases as assets and the associated obligation as liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments.

Minimum lease payments are apportioned between the finance charge and the outstanding capital portion, using the effective interest rate method. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of return on the remaining balance of the liability.

Operating leases - lessor

Operating lease revenue is recognised as revenue on the straight-line basis over the lease term..

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on the straight-line

Operating leases - lessee

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.14 Leases (continued)

Operating lease payments are recognised as an expense on the straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on the straight-line basis.

1.15 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, their costs are their fair value as at the date of acquisition.

The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Subsequent measurementinventories

Inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution. Management estimate, based on their assessment of quality and volume, the extent to which inventory on hand at the reporting date will be sold below cost.

Current replacement cost is the cost the group incurs to acquire the asset on the reporting date.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Derecognition

The municipality derecognises inventory on disposal, or when no future economic benefits are expected from its use or disposal. The gain or loss arising from derecognition of inventory is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the inventory. Such difference is recognised in statement of financial performance.

1.16 Impairment of cash and non-cash generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.16 Impairment of cash and non-cash generating assets (continued)

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the group; or
- the number of production or similar units expected to be obtained from the asset by the group.

Judgements made by management in applying the criteria to designate assets as cash-generating assets or non-cash-generating assets, are as follows:

[Specify judgements made]

Reversal of impairment loss

The group assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.17 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.17 Impairment of non-cash-generating assets (continued)

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the group; or
- the number of production or similar units expected to be obtained from the asset by the group.

Reversal of an impairment loss

The group assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the group estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.18 Internal reserves

Compensation for occupational injuries and diseases (COID) reserve

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.18 Internal reserves (continued)

The Compensation for Occupational Injuries and Diseases Act (Act 130 of 1993) is aimed to provide for payment of medical treatment and compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, or for death resulting from such injuries or diseases. The contribution to the COID fund is 0.75% of the salary expense.

The municipality is an exempt employer in terms of Section 84 (1) (a) (ii) & (2) and as such does not pay any assessments to the COID Commissioner. In terms of the exempt status the municipality is mandated to establish its own fund and administers this fund in terms of the COID Act.

The certificate of exemption issued by the Commissioner and prescribed by the COID Act requires the Municipality to deposit cash and/or securities with the Commissioner, the market values of which in aggregate shall not be less than the capitalised value of the Municipality's continuing liability as at 31 December of each year.

The continuing liability is that of annual pensions, the capitalised value of which is determined on the basis of an actuarial determination prescribed by the Commissioner.

A COID reserve has been established to equate to the value of the continuing liability. The market value of the securities is determined annually by the Commissioner, and the Municipality is required to meet any shortfall in the aggregate value of the securities as at 31 December. Monthly pensions are funded by transferring funds from the reserve to the expense account in the statement of financial performance.

1.19 Budget information

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019 to 2021.

The group annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.20 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

The Municipality recognises the expected cost of bonus, incentive and performance related payments when and only when:

- (a) it has a present legal or constructive obligation to make such payments as a result of past events,
- (b) a reliable estimate of the obligation can be made.

The City contributes to defined contribution plan and defined benefit plan.

Defined contribution plans

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Defined benefit plans

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.20 Employee benefits (continued)

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The defined benefit funds are actuarially valued on the projected credit method.

Consideration is given to any event that could impact the funds up to end of the reporting period where the valuation is performed at an earlier date.

Past service costs are recognised immediately in the statement of financial performance in the reporting period in which the plan is amended.

Actuarial gains and losses are recognised in full in the statement of financial performance when they arise.

The Group provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some employees based on the qualification criteria.

Multi-employer plans

The municipality classifies a multi-employer plan either as a defined contribution plan or a defined benefit plan. Under the defined benefit plan, the Municipality accounts for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

1.21 Provisions and contingencies

Provisions are recognised when the municipality has a present obligation (legal or constructive) as a result of a past event and:

- It is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- A reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

A contingent asset is a possible asset that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

A contingent liability is a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits or service potential is probable.

Where the effect of the time value of money is material, the amount of the provision is discounted to present value at the discount rate which is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the group settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Additional disclosures of estimates of provisions are included in the provisions note.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.21 Provisions and contingencies (continued)

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The group recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

1.22 Revenue from exchange transactions

Revenue is recognised at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Revenue from sale of Bus ticket points

Revenue from the sale of ticket points is accounted for as a separately identifiable component of a sale for normal points and bonus points. Each point is equivalent to the value of one rand. Bonus points are earned by customers only on purchase of points above the value of R50. Any bonus points not redeemed in 36 months (3 years) are subject to expiry thereafter any deferred revenue previously recognised is then recognised as revenue.

Revenue arising from sale of bus tickets for both normal and bonus points is initially accounted for as deferred revenue (liability) in the statement of financial position and only recognised as revenue upon redemption of normal or bonus points, or upon the expiry date.

Revenue is recognised at fair value for normal points. Bonus points are also recognised at fair value which is equivalent to the cost of transferring the points. The consideration allocated to the bonus points is measured by reference to the amount which the bonus points could be sold separately.

At the end of each period, deferred revenue is recognised which is measured at fair value of points earned which are yet to be redeemed.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the group;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on the straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

Income from agency services

Revenue arising from situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of commission or fee payable to the municipality for services performed.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.22 Revenue from exchange transactions (continued)

Finance income

Interest is recognised on a time- proportion basis, in surplus or deficit, using the effective interest rate method.

1.23 Revenue from non-exchange transactions

An inflow of resources from non-exchange transactions recognised as an asset shall be recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

Fines

The group has two types of fines:

- · Traffic fines issued in terms of the Criminal Procedures Act
- · Traffic fines issued in terms of the Administrative Adjudication of Road Traffic Offences Act (AARTO ACT).

Criminal Procedures Act fines:

These fines are issued in terms of the Criminal Procedures Act and are usually issued by way of notice to offenders, and can:

(a) indicate the value of the fine to be paid, and that certain reductions could be made to the value of the fine payable and how, or the circumstances under which, such reductions can be applied, or

(b) indicate that the offender must appear in Court on a specified day (in these instances, the value of the fine may or may not be indicated but this is often only determined after a separate legal process).

Initial recognition:

There is uncertainty regarding the probability of the flow of economic benefits in respect of criminal procedure act fines. Legal processes have to be undertaken before the criminal procedure act fine is enforceable. In respect of summonses the public prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender. Where a reliable estimate cannot be made of revenue from summonses, the Municipality cannot recognise revenue and receivable until this judicial process has been completed and a reliable estimate can be made.

Subsequent measurement

IGRAP1 states that the assessment and recognition of an impairment is an event that takes place subsequent to the initial recognition of revenue charged. An entity assesses the probability of collecting revenue when accounts fall into arrears. Such an assessment should not be made at the time of initial recognition.

AARTO traffic fines

These are fines issued in terms of the AARTO Act by way of notices to offenders which specify the value of the fine that must be paid, along with any discount that can be applied if the fine is paid within a specific period of time.

Initial recognition

The COJ is legally entitled to 50% of the face value of the fines, taking into account the best estimate of the inflow of economic benefits in terms of GRAP 23.

In terms of the AARTO ACT par 32(1) and (2), RTIA is legally entitled to receive 50% of the face value of such fine plus other administrative cost so incurred as compensation for their services in collecting and adjudication process.

Subsequent measurement

IGRAP1 states that the assessment and recognition of an impairment is an event that takes place subsequent to the initial recognition of revenue charged. An entity assesses the probability of collecting revenue when accounts fall into arrears. Such an assessment should not be made at the time of initial recognition

Government grants

Government grants are recognised as revenue when:

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.23 Revenue from non-exchange transactions (continued)

- it is probable that the economic benefits or service potential associated with the transaction will flow to the group.
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

Conditional grants

Conditions on transferred assets (hereafter referred to as conditions) require that the entity either consume the future economic benefits or service potential of the asset as specified or return future economic benefits or service potential to the transferor in the event that the conditions are breached. Therefore, the Municipality incurs a present obligation to transfer future economic benefits or service potential to third parties when it initially gains control of an asset subject to a condition. This is because the Municipality is unable to avoid the outflow of resources as it is required to consume the future economic benefits or service potential embodied in the transferred asset in the delivery of particular goods or services to third parties or else to return to the transferor future economic benefits or service potential. Therefore, when a Municipality initially recognises an asset that is subject to a condition it also recognises a liability. Revenue on such grants is recognised when the qualifying expenditure has been incurred and to the extent that conditions have been complied with.

Unconditional grants

The Municipality recognises revenue from unconditional grants upon receipt and/or when resources transferred meet the criteria for recognition as an asset and there is also no present obligation to the Municipality to refund transferred resources to the transferor.

Unconditional grants also includes grants with restrictions since restrictions do not include a requirement that the transferred asset, or future economic benefits or service potential be returned to the transferor if the asset is not deployed as specified. Therefore, gaining control of an asset subject to a restriction does not impose on the Municipality a present obligation to transfer future economic benefits or service potential to third parties when control of the asset is initially gained. The Municipality recognises grants with restriction and unconditional grants as revenue upon receipt of the grant and no corresponding liability is recognised. Unconditional grants are measured at their fair value.

Rates

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Revenue from rates is measured using gazetted tariffs.

Public contributions and donations including goods in-kind donations

Public contributions and donations are voluntary transfers of assets including cash or other monetary assets.

Goods in-kind are tangible assets transferred to an entity in a non-exchange transaction, without charge, but may be subject to stipulations.

Public contributions and donations (other than services in-kind) are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the entity and the fair value of the assets can be measured reliably.

Goods in-kind are recognised as assets when the goods are received, or there is a binding arrangement to receive the goods. If goods in-kind are received without conditions attached, revenue is recognised immediately. If conditions are attached, a liability is recognised, which is reduced and revenue recognised as the conditions are satisfied.

Public contribution and donations including goods in-kind are measured at their fair value as at the date of acquisition.

1.24 In-kind services

The Municipality does not recognise services in kind as revenue or assets, but separately discloses the nature and type of major classes of services in- kind as a note to the financial statements.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.25 Unauthorised expenditure

Unauthorised expenditure is any expenditure incurred by a municipality otherwise than in accordance with the approved budget as well as expenditure exceeding the limits of the amounts appropriated for in the different votes in the approved budget.

Depending on circumstances, identified unauthorised expenditure will be authorised by council in an adjustment budget, certified by municipal council as irrecoverable and written off by the council or recovered from a liable official or political office bearer. In cases where unauthorised expenditure is recoverable from an official or political office bearer resulting from necessary investigations, revenue and receivables are recognised. Unauthorised expenditure is disclosed in the notes to the financial statements.

1.26 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain, and would have been avoided had reasonable care been exercised.

Fruitless and wasteful expenditure which was incurred and identified during the financial year and also condoned by the council in terms of the MFMA, is only disclosed in the notes to annual financial statements. However, fruitless and wasteful expenditure which was incurred and identified during the financial year but failed to be condoned by the council is initially recognised as expenditure based on its nature and after further investigations classified to receivables and revenue. Where it is not possible to recover the revenue recognised from fruitless and wasteful, the receivable is written-off following proper write off processes in terms of the MFMA.

1.27 Irregular expenditure

Irregular expenditure is expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the MFMA, the Municipal Systems Act, or the Public Office-Bearers Act, and which has not been condoned in terms of the MFMA.

Irregular expenditure which was incurred and identified during the financial year is disclosed in the annual financial statements. It will be accounted for as an expenditure in the statement of financial performance and disclosed separetly in the notes to the financial statements

1.28 Related parties

Close family members of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the Municipality.

Related party relationships where control exists are disclosed. The municipality discloses the nature of the related party relationship as well as information about those transactions and outstanding balances as a note to the financial statements.

1.29 Events after the reporting date

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date);
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

Reporting date means the last day of the reporting period to which the financial statements relate. The entity adjusts the amounts recognised in its financial statements to reflect adjusting events after the reporting date. The entity does not adjust the amounts recognised in its financial statements to reflect non- adjusting events after the reporting date.

The group will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The group will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

Group Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.30 Commitments

A Commitment is a contract that is non-cancellable or only cancellable at significant cost, to the extent that the amount has not been recorded elsewhere in the financial statements.

Commitments are further split into capital and operating commitments.

Capital commitments are amounts committed to acquire goods and services which are of capital in nature i.e. upgrading and/or construction of assets.

Capital commitments are disclosed in the notes to the annual financial statements.

2. STANDARDS AND INTERPRETATIONS NOT YET EFFECTIVE

In the current financial year, the Municipality has adopted effective revised standards and its interpretations issued by ASB. However, the municipality only adopted effective standards which are relevant to its business operations.

The following Standards and Interpretations were in issue but not yet effective:

<u>Name</u>	Effective Date
GRAP 18 - Segment Reporting	01 April 2020
GRAP 20 - Related Parties	01 July 2019
GRAP 32 - Service Concession arrangements: Grantor	01 July 2019
GRAP 34 - Separate financial statements	01 April 2020
GRAP 35 - Consolidated financial statements	01 April 2020
GRAP 36 - Investment in associates and Joint ventures	01 April 2020
GRAP 37 - Joint Arrangements	01 April 2020
GRAP 38 - Disclosure in interest in other entities	01 April 2020
GRAP 108 - Statutory receivables	01 July 2019
GRAP 109 - Accounting by principles and agents	01 July 2019
GRAP 110 - Living and non-living resources	No effective date has been determined by the Minister of Finance

IGRAP 17 - Interpretation of the standard of GRAP on service concession arrangements where a grantor controls a significant residual interest in an asset

IGRAP 18 - Interpretation of the Standard of GRAP on recognition and derecognition of land

IGRAP 19 - Liabilities to pay levies

The above-mentioned standards and interpretations which are relevant to the Municipality's business operations will be adopted once they become effective.

The municipality applied the principles established in the Standard of GRAP that has been issued, but not yet effective, in developing an appropriate accounting policy dealing with the Related Parties (GRAP 20).

The other standards are similar to existing standards applied by the City and are unlikely to impact the financial position or performance of the entity, but may impact the extent of disclosures provided

		265 436	303 474	78 504	78 040

Cost of inventory expensed is included under bulk purchases and cost of inventory expensed. Provision for inventory write-down comprises of the cumulative balance of inventory on hand that is written down to the net realisable value.

The increase in the provision is mainly caused by the following:

Water

The significant increase in the provision for obsolete stock relates to prepaid meters. These prepaid meters were acquired in 2008, and were unable to be deployed as the Mazibuko court case suspended all roll outs of the prepaid meters. When the roll out program resumed in 2012, these meters were deemed unfit for purpose and were transferred to operations for the meters to be used as conventional meters. This has since also proved to be unsuccessful resulting in the increased contribution to obsolescence. The increase compared to the prior year amounted to approximately R55.5 million

Power

5 additional items which are considered impaired and resulted in an increase in the provision. These items amounts to approxiamately 50% of the provision for Power. The increase compared to the prior year amounted to approximately R19.6 million.

Impairment of loan to Pikitup Johannesburg (Pty) Ltd

The City had entered into a concession with the entity where it agreed to consistently settle interest that becomes due. Although Pikitup has significantly improved its solvency and liquidity position, the continued existence of the concession implies the existence of risk in defaulting.

Impairment of Ioan to Metro Trading Company (Pty) Ltd

Metro Trading Company has not made any repayments towards the loan in the current year even though the amounts are due and payable

Reversal of impairment - Johannesburg Metropolitan Bus Services (Pty) Ltd

The reversal of impairment relates to the amount recovered from the entity.

11. FINANCIAL ASSETS AT FAIR VALUE - SINKING FUND

The Debt redemption fund is a financial solution to assist the CJMM meet its financial obligations to repay previously issued bonds. The CJMM pays contributions into the fund, which is managed by a 3rd party fund manager, so as to enable the Municipality to receive contributions plus growth to repay redemptions of the bonds when they fall due. This is part of the risk management framework adopted by the CJMM. The financial liabilities of the fund are disclosed in note 29.

The total investments are pledged as collateral for CJMM Bonds.

The investments pledged as collateral cannot be sold until the related liability is settled in full.

The Terms and conditions are such that the collateralised asset upon maturity should be of the same value as the liability so that the liability can be redeemed.

20. INVESTMENT IN ASSOCIATE

Name of entity		Carrying	Carrying
Friedshelf 128 (Pty) Ltd		amount 2019	amount 2018 16 240
. 11013/1011 120 (1 1)/ 2.10	-		16 240

The CJMM through Pikitup (SOC) held 50% shares in Friedshelf 128 (pty) Ltd. The CJMM was only considered to have significant influence over the operations of the company.

Movements in carrying value

Opening balance Share of (deficit)/ surplus Disposal of investment in associate (See note below)	16 240 - (16 240)	15 602 638 -
,		16 240

During the 2018/2019 financial year, a decision was taken to dispose of Pikitup's shareholding in Friedshelf (128) Pty (Ltd). The directors of Friedshelf (128) Pty (Ltd) resolved to discontinue the activities of the entity which led to the sale of its main asset i.e building. As at 30 June 2019, the winding down of activities were not yet concluded however 97% of the distributable reserve was distributed to the shareholders. Pikitup's share of the distributable reserve amount to R15 296 223. The remaining 3% has been retained to cover any unknown winding down expenses that may arise. The Pikitup's share of R15 296 223 was accounted for against the investment of R16 240 072 which led to a loss on disposal of the investment in the associate. This loss is accounted for in the statement of financial perfomance

Office Equipment

The Group leases certain office equipment and these are classified as a finance lease. The lease terms range between 2 to 5 years.

Plant and Equipment

The Group leases plant and equipment. The lease term is 3 years and the average implicit rate is 10%. The obligations under finance leases are secured by the lessor's charge over the leased assets.

Specialised vehicles

The Group leases certain BRT vehicles, emergency service vehicles and Pikitup's special vehicles. The lease terms for these vehicles range between 10 to 12 years.

The carrying values of these leased assets are included under property, plant and equipment.

	1 199 552	1 059 567	135 061	123 695

1. Bonus provision

Bonus provision relates to the performance bonus for the section 57 employees. It also relates to performance bonuses of employees of municipal entities that are to be paid if certain conditions are met which are assessed after 30 June.

2. Provision for legal claims

Provisions for damages relate to the following claims against the City:

2.1 Maintenance Contract

An arbitration matter in which Questek, the claimant, claims that the City must pay it approximately R14 million for services rendered in a maintenance contract at the City's request. The City does not deny the services rendered for R14 million.

2.2 Connaught court case

The provision is in respect of properties used for both business and residential but rated for business only. The City was of the view that it can rate the properties as business only which is in line with its rate policy. However, the courts held that the City's rate policy does not take precedence over the Municipal Property Rates Act and the City is obliged to apportion the value of the properties in terms of the Municipal Property Rates Act.

2.3 Damages claims

A claim of R10 million instituted against the City for damages for loss of business as a result of the construction of the Grayston Drive flyover across Katherine Street, Sandown. The matter has became dormant for long periods, as the last trial date was October 2012 which did not take place and the matter was further postponed.

A litigation in progress that is likely to be paid by Johannesburg Road Agency based on the previous legal actions taken against the entity. The Legal claims emanates from supply chain related matters which occurred in the past and the employment related matters from former and current employees against JRA. The legal claims for on-going cases have been reassessed in the current year based on new developments in the cases.

3. Kelvin ash disposal

Ash disposal provision has been provided for in respect of the Kelvin power station. There is a dispute as to which entity is responsible for these costs between Kelvin Power and City Power.

Group Annual Financial Statements for the year ended 30 June 2019

Notes to the Group Annual Financial Statements

	GROUP		CJMM	
Figures in Rand thousand	2019	2018	2019	2018

4. Provision for subsistance allowance

Subsistance allowance

The applicants brought an application for a declaratory order for the payment of travel time. The matter was ventilated at court and judgement was granted against the City ordering the City to pay for travel time. The City is appealing the decision. The application for leave to appeal was dismissed with a cost, without the judge granting reasons for such refusal for leave to appeal.

5. Environmental rehabilitation: landfill sites (closed and open)

The provision relates to Pikitup (SOC) Ltd landfill sites. On an annual basis, management has to determine an accurate estimate of the environmental obligation to rehabilitate the various landfill sites upon closure. During this process management places reliance upon the final Landfill Airspace Estimation Report as compiled by an independent consulting engineer for the technical data utilised in the provision and lifespan estimates.

The landfill airspace estimation as reported by the consulting engineer was performed by the Topographical surveyor who has extensive experience in the field with an Advanced Mine Survey Certificate -M3.

The calculations of the landfill rehabilitation are based on the following assumptions in line with the permit requirements and consistent with prior years:

The final side slopes for each landfill is 1:3;

The cover to waste ratio is 1:5 for each site;

The growth rates for each site are based on zero growth;

The final landfill footprint extends over the entire landfill property size (excluding infrastructure and a 20m buffer zone between the site boundary and the toe of the landfill; and

The density of the waste is calculated using both the survey and weighbridge data.

27.1.2 Unfunded post-retirement housing subsidy plan

The CJMM provides housing subsidies in respect of certain qualifying staff members. In the event that the housing loan that the subsidy related to is not fully repaid at retirement date, the subsidy will continue into the members' retirement. The subsidy amount is assumed to remain constant and to continue for a period of 10 years after retirement.

29. FINANCIAL LIABILITIES AT FAIR VALUE - SINKING FUND

The debt redemption fund is a financial solution to assist the CJMM meet its financial obligations to repay previously issued bonds. The CJMM pays contributions into the fund, which is managed by a 3rd party fund manager, so as to enable the Municipality to receive contributions plus growth to repay redemptions of the bonds when they fall due. This is part of the risk management framework adopted by CJMM. The financial assets in the fund are disclosed in note 11

The total investments are pledged as collateral for CJMM Bonds

The investments pledged as collateral cannot be sold until the related liability is settled in full.

The terms and conditions are such that the collateralised asset upon maturity should be of the same value as the liability so that the liability can be redeemed.

Sinking Fund Maturity - 5 June 2023

Other deposits relate largely to deposits held as part of rental agreements between tenants and JPC Portfolio, Joshco Community Development and the Housing Department.

32. LOANS FROM MUNICIPAL ENTITIES

Notional Accounts

The liability with the municipality entities was undertaken by the City of Johannesburg Metropolitan Municipality to cover the portion of the post retirement liability accrued for the employees of City of Johannesburg Metropolitan Municipality who were transferred to municipal entities when they were established. The amount of the liability was determined at 1 July 2003 and has been accounted for in the form of a notional loan account which earned interest and against which the municipal entities may claim benefit payments.

This grant is made available to support municipal capital budgets to fund municipal infrastructure and to upgrade existing infrastructure, primarily for the benefit of poor households. The Urban Settlement Development Grant contributes towards the achievement of sustainable human settlements and improved quality of household life by implementing infrastructure development projects that work towards the realisation of adequate housing and improved quality environments and a functional residential property market. The infrastructure development projects include roads, bridges, water supply network, sanitation services, electrical reticulation, social and recreational services, cemeteries, markets as well as release of well-located land.

To transform urban and rural community library infrastructure, facilities and services through a recapitalised programme at provincial level in support of local government and national initiatives. The funding is intended to address backlogs and disparities in ongoing provision and maintenance of community library services across municipalities and enable provincial departments to provide strategic guidance and alignment with national priorities.

The Grant assists in providing an important avenue for labour absorption and aids transfers of income to poor households. It uses expenditure on goods and services to create work opportunities for the unemployed. EPWP Projects employ workers on a temporary or on-going basis either by government, by contractors, or by other non-governmental organisations under the Ministerial Conditions of Employment for the EPWP or learnership employment conditions.

Municipal Equitable Share is the share of Local Government Sphere's share of revenue raised nationally. The equitable share allocation is a subsidy received from National Treasury and is mainly for RSC levies replacement, special support for councillors' remuneration, ward committees and funding for free basic services (Basic Social Services Package) for the registered indigent households.

	Sewer purification	26 548	23 776		-
		16 535 145	15 173 013	-	-
	The bulk purchases for the year includes electricity distribution losses	ity distribution losses and w	ater losses.		
	Electricity distribution losses				
	Electricity distribution losses Technical losses	1 029 319	970 859	-	-
	Electricity distribution losses			:	-

The electricity energy losses can be classified into technical losses and non-technical losses. The technical losses for the year are measured at 9% and these relate to energy that is lost in the transportation of electricity from the point of supply to point of distribution through evaporation.

The entity's non-technical losses increased from 14.3% to 16.3%. The non-technical losses are attributable mainly to the following:

- Theft and bypass of meters
- Illegal decalibration of meters
- Damaged meters and faulty voltage and current transformers
- Billing errors
- Customers without meters

Water Losses

Physical losses Commercial losses	1 000 000 386 000	878 400 340 800	-	-
	1 386 000	1 219 200	-	-

The level of physical losses for the year under review is 17.9% [R1.0 Billion], (2018: 18.3% [R878.4 million]). The level of commercial losses for the year under review is 6.9% [R386.0 million], (2018: 7.1% [R340,8 million]).

It is acknowledged and accepted that a certain level of water losses cannot be avoided from a technical perspective and is considered acceptable from an economic perspective. This means the cost of interventions to reduce water losses from a technical perspective are less than the savings that can be realised. The industry norm for water losses is 18%. This norm is exceeded by the company by 6.8% [R380.4,0 million], (2018: 7.5% [R360 million]). The industry norm of 18% applied is 2% more stringent than the benchmark of 20% as published by the South African Water Research Commission.

47. COMMITMENTS

Commitments in respect of capital expenditure:

Authorised and contracted for

Capital Commitments

7 867 438

8 344 604

2 285 719

3 766 170

This committed expenditure relates to fixed assets and will be financed by government grants, existing cash resources and external loans etc.

Operating leases - as lessee (Fleet)

Minimum lease payments due

within one yearin second to fifth year inclusive

The Group leases vehicles from fleet service providers. In terms of the agreement, all rentals due on vehicles leased are payable monthly in arrears and are linked to the prime overdraft rate. Furthermore the agreement places restrictions on maximum number of kilometres which can be travelled over the lease term and specifies the rate at which excess kilometres will be billed.

Operating leases - as lessee (Buildings)

Minimum lease payments due

within one year
in second to fifth year inclusive

	308 537	188 134	17 258	83 195
o fifth year inclusive	154 739	78 267	-	17 258
rear	153 79 8	109 8 67	17 258	65 937

Leases for buildings are negotiated for a term of 2 to 5 years for department occupied buildings and the ME's head offices. JPC head office lease term is 10 years. Some leases are subject to yearly escalations at an average of 9%.

Group Annual Financial Statements for the year ended 30 June 2019

48. CONTINGENCIES

GROUP

Legal Claims by residents/companies

	Name of the company responsible	Estimated Amount in R'000
Claim for breach for allegedly failing to provide sufficient electricity for development after rezoning a property. Claim is defended on the basis that sufficient electricity is available and Plaintiff was aware of available supply. The court dismissed the application and the parties agreed that the allocated time for trial was not sufficient as a result they are currently awaiting new trial date.	CJMM	6 289
Plaintiff brought summons against the City and Johannesburg Municipal Pension Fund for unpaid benefits. The City disputes the claim. The city will enter an exception to the plea. The hearing of the exception has been set down on 21 June 2018. The hearing was not set down due to new development on the case. City attorneys are filing heads of argument.	СЈММ	1 431
Claim by Metropol Consulting Pty Ltd for services rendered.	CJMM	266 000
Developmentnomics (Pty) LTD. The Plaintiff claims to have suffered damages to the extent of lost income for the full duration of the agreement concluded with the City. Pleadings have closed and the matter is awaiting set down.	СЈММ	2 640
Claim by Kenneth Corlette relating to alleged damages for loss of amenity due to City approving certain land uses adjacent to the plaintiff's property. Trial date set for 9, 10, and 11 September 2019.	СЈММ	17 000
There is a dispute the members of SALA Pension Fund lodged with the City of Joburg subsequent to their transfer to eJoburg pension fund. The court decided that if this matter should proceed there should be a joinder by all the affected parties	СЛММ	20 951
The Plaintiff sued the City for damages. the Plaintiff alleges arose from the City's non enforcement of the by-laws. The City defended the action and filed its plea. A trial date is being awaited.	СЈММ	5 800
Fundi Communications claim against COJ for services rendered. A trial date is being awaited.	СЈММ	952
Great Life Trading claim for monies to be paid by City for tickets. The plaintiff is a ticket vendor hence claiming the loss of business. Trial date set for 3 September 2019. The City does not deny the money for the tickets but has a problem with a claim for loss of business by plaintiff.	СЈММ	1 401
International Art Solutions LLC versus Johannesburg City Theatres. The Plaintiff (an international company) is suing the Johannesburg City Theatres for the cancellation of the Soweto Jazz Festival in 2018. A plea and request for security has been served.	Joburg Theatre (SOC) Ltd	24 505
The City is been sued for loss of income after Mathipane Tsebane was unlawfully and arbitrarily removed from the COJ Attorney collection panel and the court having ordered his reinstatement, the City having failed to reinstate.	СЈММ	180 000
Ubuntu Kraal (Pty) Ltd vs JDA & CJMM - JDA has been served with summons for loss of income and damages to property by the operators of the establishment known as Ubuntu Kraal in Soweto, Johannesburg. The damages were alleged to have been caused by flooding due to the JDA activities in the construction of the Rea Vaya BRT infrastructure along Klipspruit Valley Road. The matter is now being handled by CJMM insurer attorneys. The matter was set for trial in June 2018 but was withdrawn from trial roll. There has been no developments since then. The plaintiff's attorneys have withdrawn as attorneys of record on this matter and the attorneys that are meant to take over this matter have not yet filed their notice of substitution. We have written to the attorney and are yet to receive a response as to whether they still intend pursuing this matter.	Development Agency (SOC) Ltd	23 500
BRT - Thembu Convenience Store: The City was served with a summons by Tembu Convenience Centre CC, trading as a convenience store and Engen Fuel dealership, for loss of income as a result of BRT construction works. The City has filed its papers defending the matter in the South Gauteng High Court. JDA is defending the matter. The matter went for trial on 6 to 8 June 2017. A judgment was in the JDA's favor and the case was dismissed with costs of tow counsels on 15 September 2017. On the 27th February 2018, the High Court had granted Tembu Convenience Centre CC their application for leave to appeal. The JDA has successfully defended the matter at the Supreme Court of Appeal and was awarded costs.	Development Agency (SOC) Ltd	17 800

Notes to the Group Annual Financial Statements

Grayston Pedestrian Bridge scaffolding collapse: The scaffolding work into the Grayston Drive Pedestrian and Cyclist structural bridge collapsed on 14 October 2015 which resulted in the loss of life and other damages. Due to the nature of the incident, the Department of Labour (DOL) has to conduct a formal inquiry to determine the causes for the collapse of the scaffolding works. The inquiry commenced on 7 July 2016 and a Commissioner appointed by the DOL. The hearing took place and was completed. We now await the report with the outcome from the Commissioner from the DOL.	Agency (SOC) Ltd	
Applemint vs JRA. JRA was served a letter of demand to do work on the applicants property which has experienced a sinkhole as a result of the storm-water drain running through his property.	Road Agency (SOC) Ltd	-
Liepollo Selatile vs JRA. The Application for review to set aside the award dated 22nd December 2018 in terms of SALGBC found that the Applicants dismissal was procedurally and substantively fair.	Road Agency d (SOC) Ltd	-
City Power has submitted tax returns with SARS for 2015 and 2016 financial years claiming 100% bad debt allowance. However the South African Revenue Services has approved a deduction of 25% in terms of bad debt allowances. City Power is currently continuing to claim a 100% allowance as it is appealing the decision of the Receiver. Should the appeal be unsuccessful the tax liability for 2015, 2016 and 2017 would increase.	City Power (SOC) Ltd	-
Veli Sipho Phaloane instituted civil claim against JMPD. In his claim he alleges that he developed an App for reporting reckless and negligent driving. On the 27 March 2019 Executive Mayor launched Buya Mthetho hotline for reporting reckless and negligent driving. The Plaintiff further alleges that the City unlawfully appropriated his intellectual property. The City is defending the matter. We have filed exception notice to the Plaintiff summons, the Plaintiff failed to reply to our notice of exception.	СЈММ	162 000
JHB Housing Company has lodged legal proceedings against the entity. The dispute relates to the entity's inability to provide additional electricity capacity available for a new electricity connection.	City Power (SOC) Ltd	2 142

Group Annual Financial Statements for the year ended 30 June 2019

Notes to the Group Annual Financial Statements

GROUP

1. Receivables from exchange transactions

Various COJ entities had errors due mistatement in the previous financial year, and has been corrected

2. Consumer Debtors and Rendering of services

The City of Johannesburg Metropolitan Municipality has recalculated the water and electricity accrual value in relation to the 2017 and 2018 financial years. These transactions results in an adjustment to revenue for the 2017 and 2018 financial years as disclosed below. This has been accounted for as a prior period adjustment accordingly.

3. Current tax receivable

An error in the calculation of company tax for Joburg Market in the prior year was identified and corrected in the current year. The error resulted from passing an incorrect journal to the company tax account.

4. Property, plant and equipment

The error was as a result of incorrect classification of Heritage and Intangible assets as PPE

5. Deferred Tax

The effects of the restatements in assets and liabilities have affected the Defferred tax balances. The biggest contributor is City Power.

6. Finance lease obligations

There is a prior year adjustment on the finance lease balance. The amount consist of an adjustment on the minimum lease payments and future finance charges in PIKITUP SOC (Ltd)

8. Depreciation

This error is due to assets which were completed and ready for use in the previous financial year but only capitalised in the current year. As a result, prior year has been restated

9. General Expenses

This was mainly due to the reclassification of contracted services and repairs and maintenance into their respective expenses as generalal expenses by their nature

CJMM

Property, Plant and Equipment (PPE), Heritage Asset and Intangible Assets

The error was as a result of incorrect classification of Heritage and Intangible assets as PPE

Depreciation

This error is due to assets which were completed and ready for use in the previous financial year but only capitalised in the current year. As a result, prior year has been restated

Related Party Payables, General Expenses and Receivables from exchange transactions(Accrued VAT)

The error is due mistatement in the previous financial year, and has been corrected.

Receivables from non-exchange transactions

This result from the reversal of consumer deposits accounted for without cash receipt

Group Annual Financial Statements for the year ended 30 June 2019

Notes to the Group Annual Financial Statements

Figures in Rand thousand

50. RISK MANAGEMENT

Price risk

The CJMM, through Group Treasury and Finance Strategy and Planning unit (Treasury) manages financial risks through usage of two portfolios consisting of financial instruments. For the purposes of this disclosure, portfolios are assigned as Portfolio 1 and 2. Portfolio 1 is managed internally by the CJMM whereas Portfolio 2 is outsourced to a specialist Fund/Portfolio Manager.

Portfolio 1 Overview

Effective financial risk management is vital to CJMM. The realisation of the CJMM's objectives toward service delivery depends on CJMM's sound management of financial risks which enable the City to anticipate and respond to changes in the market environment as well as making informed decisions under conditions of uncertainty.

The CJMM is exposed to the following financial risks from the use of financial instruments:

- Liquidity risk and Concentration risk (including integrated cash flow management)
- · Market risk.
- Credit/Counterparty risk

To ensure the execution of and compliance to overall risk management policies and guidelines, CJMM plays a focal role in:

- The maintenance of sound liquidit€y levels such that optimal returns on surplus cash are realized and interest expenses minimized.
- Ensuring that CJMM's Credit rating is maintained or improved by ensuring that financial risk ratios fall within required limits.
- Ensuring the sustainable financial viability of COJ by avoiding the occurrence of uncontrolled losses that could arise as a result of exposure in the financial markets with the overall aim of protecting CJMM's financial position.
- Providing Council with reasonable assurance that financial risks the CJMM is exposed to are identified and, to the best extent
 possible, mitigated and controlled.

The City, identifies, quantities and sets up control measures to mitigate financial risks to an acceptance level.

Financial Risk Management Framework

The Risk Management Framework serves to raise awareness, inform and guide the Group on its approved approach to risk management. The framework, which is reviewed on a continuous basis in line with best market practices, seeks to assist the Group in the effective identification, evaluation and control of financial risks that may impact upon the realization of corporate, mayoral and service delivery objectives and priorities that the Group has set itself to achieve.

Council, through the CFO's forum, has overall responsibility for the establishment and oversight of the CJMM's risk management framework. CFO's forum, in this regard, is responsible for developing and monitoring the CJMM's financial risk management policies. CFO's Forum reports regularly to the Mayoral Committee and Section 79 on its activities.

The CJMM's financial risk exposures are managed by the Treasury Unit. The CJMM's activities expose it to a variety financial risks. The municipality's overall financial risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the CJMM's financial performance. The group recognizes that an effective risk management function is fundamental to its operations. Risk awareness, control and compliance are embedded in Treasury's day-to-day activities.

Liquidity and Concentration Risk

Liquidity Risk,refers to the risk that CJMM may not meet its short term obligations when they fall due. Management of liquidity risk is particularly important as it ensures that capital and operating expenditure is met. Treasury enters into liability obligations to bridge funding gaps arising from both capital and operational expenditure with the aim of ensuring that CJMM meets its liability obligations when the fall due.

Group Annual Financial Statements for the year ended 30 June 2019

Notes to the Group Annual Financial Statements

Figures in Rand thousand

For each financial year, Council approves a funding plan that minimizes liquidity risk. CJMM manages both the long term and short-term cash requirements, with surplus funds from operations being invested in short term money market instruments.

Long-term liquidity risks arising from capital projects initiatives are managed through issurance of long-term debt in the form of CJMM bonds or long term loans or a combination of the two. Both Short-term and Long-term borrowings are approved as per council approved funding plan

The table below indicates approved facilities as at the end of June 2019:

Details	Approved Funding R'000	Total Utilised R'000	Repaid R'000
Short-Term Borrowings Short term Borrowings Long-Term Borrowings	3 675 000	1 500 000	1 500 000
Long term borrowing	2 849 000	2 849 000	-
Total	6 524 000	4 349 000	1 500 000

Short-term liquidity constraints are managed through two types of short-term funding methods:

i) General Banking Facilities (overdraft); and

ii) Commercial Paper Issuance.

CJMM's Treasury ensures that all short term facilities utilized within the financial year are paid before the end of the financial year in Compliance with Section 45(4) (a) of the MFMA. A cash management policy for managing its short-term cash flows and cash balances in a cost-effective manner is in place. The cash management policy assists the Group in managing its liquidity risk through the use of cash projection models with the aim of minimizing variances between projected and actual cash usage.

Liquidity risk is also linked to Concentration risk which could be defined as the probability of high cash outflow arising from concentration of debt obligations payable around the same period, If not properly managed, concentration risk can lead to default risk.

Notes to the Group Annual Financial Statements

Figures in Rand thousand

Market risk

Market risk is the risk that changes in market prices, such as interest rates and commodity prices will affect the CJMM's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures to be within acceptable risk parameters, while optimizing the CJMM's service delivery objectives. GRAP 104 requires entities to disclose sensitivity analysis for each type of market risk as shown in the sections below. Interest rate risk is the main category of market risk which affects the CJMM.

Interest rate risk

This refers to the risk that the value of a financial instrument will change due to a change in

- i) the absolute level of interest rates;
- ii) in the spread between two rates;
- iii) in the shape of the yield curve or in any other interest rate relationship.

CJMM's floating rate liabilities are exposed to interest rate risk in terms of both cash flow and fair values.

Interest Rate Fair Value Sensetivity Analysis for Floating Rate Liabilities.

The fair values of the CJMM's floating rate liability portfolio are sensitive to interest rate changes. The fair values of these liabilities are based on projected cash flows calculated using market projected forward rates. The projected cash flows are then discounted using market implied discount factors. The table below shows how the fair values of floating rate liabilities change on the basis of the following assumptions:

- · The base case interest rate is at current levels (0%)
- A range of values between two upward percent and one downward percent movement in interest rates. Management generally expects interest rates to rise in the future.

Fair value sensitivity to the interest rate movement/shift for Floating Rate Loans R'000

Class	Fair Value	-1%	-0 .50%	0	0.50%	1%	1.50%	2%
Floating Rate Loans	1 971 00C	1 893 00C	1 932 000	1 971 OOC	2 011 000	2 050 000	2 089 000	2 128 00C

Fair Value Sensitivity Analysis of Variable Rate Liabilities

The fair value sensitivity analysis of variable rate liabilities shows that a 1 percentage point increase in interest rates will increase the fair value of floating rate liabilities by R78,4 million and a 1 percentage point decrease in interest rates will decrease the fair value of floating rate liabilities by R78.6 million.

Interest Rate Cashflow Sensitivity Analysis

The Floating rate tables below shows the cash flow sensitivity analysis for floating rate liabilities. The sensitivity analysis is based on the following assumptions:

- The base case interest rate is at current levels (0% changes)
- A two percent upward and one percent downward movement in interest rates.

Estimation of Fair Values

The fair value of financial instruments that are not traded in an active market(for example,trading and available for sale securities) is based on quoted market prices at the balance sheet date or determined using valuation techniques.

The CJMM uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

To determine the fair values of floating rate instruments, the CJMM uses market forward rates to estimate future interest and capital cashflows, and then utilises market implied discount rates to calculate their present values

Fair Value Hierarchy

In terms of GRAP 104, paragraph .118 and .119 there are different levels of fair values based on the extent that quoted prices are used in the calculation of the fair value. The fair value hierarchy applies to instruments reported at fair value on the statement of financial position.

Level 1: Fair value are based on quoted prices (unadjusted) in an active market for identical financial instruments.

Level 2 Fair values are calculated using valuation techniques based on observable inputs either directly or indirectly other than level 1 inputs. This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: This category uses inputs for the asset or the liability that are not based on observable market data (unobservable inputs).

Credit/Counterparty Risk

CJMM invests surplus funds with financial institutions for yield enhancement purposes. The credit limit exposure table below depicts all investments with various counterparties as at the 30 June 2019.

		Operat	ional	Ring-fe	enced			
COUNTERPA-RTY	Approved	Call Deposits	Fixed	Call Deposits	Term	Total	Available for	Percentage
CLASS	Limit		Deposits		Deposits	Exposure	use	Utilised
Domestic Banks	7 237 500	1 842 000	1 450 000	45 000	173 000	3 509 000	3 728 000	48 %
International Banks	1 050 000	3 000	-	-	-	3 000	1 047 000	- %
	8 287 500	1 845 000	1 450 000	45 000	173 000	3 512 000	4 775 000	48 %

Portfolio 2

Introduction and overview

CJMM has established a sinking fund to redeem its long term borrowings including listed bonds and bilateral loans. The fund is currently managed by an external fund manager.

The fund has exposure to the following risks from financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- · Operational risk

Group Annual Financial Statements for the year ended 30 June 2019

Notes to the Group Annual Financial Statements

Figures in Rand thousand

The fund manager has delegated authority to manage the fund in line with the council approved Portfolio Management Agreement.

Risk Management Framework

Credit Risk

Credit Risk is the risk that counterparty in a financial instrument will fail to discharge an obligation or commitment that it has entered into with the fund, resulting in a financial loss to the fund.

The fund manager invests with counterparties and in instruments meeting criteria set out in the Portfolio Management Agreement

Exposure to credit risk

The Fund's maximum credit risk at the reporting date is represented by the respective carrying amount of the relevant financial assets in the statement of financial position at 30 June 2019. The Fund was invested in the following securities, categorized as per instrument type:

Instrument Type	Fair Value R'000
Government bonds	197 000
Swaps	157 000
Floating Rate Note	306 000
Corporate Bond Assets	1 032 000
Cash	_
Cash	986 000
	-
	-
	-
	-
	-

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. There is also a risk that the fund will not deliver upon its mandate.

The fund 's liquidity risk is managed on a daily basis by the fund manager. The funds's overall liquidity is reported in the risk committe report on a quartely basis.

Maturity analysis for financial instruments

The following are the contractual maturities of financial assets and liabilities, including estimated interest payments:

Class	Trade NPV (Today)	Due in less than a year	Due in one to two years		Due in three to four years		than five
Settled Bond Assets	1 228 000	_	_	93 000	_	736 000	years 399 000
Swap Assets	157 000	_	-	-	-	-	157 000
FRN Assets	306 000	306 000	-	-	-	_	_
Cash Asset	986 000	986 000	-	_	-	-	-
	2 677 000	1 292 000		93 000	-	736 000	556 000

Group Annual Financial Statements for the year ended 30 June 2019

Notes to the Group Annual Financial Statements

Figures in Rand thousand

Market Risk

The funds markert risk is managed on a daily basis by the fund manager in accordance with the Portfolio management agreement. The funds market positions are reported to the Risk Committee on a quartely basis.

Interest rate risk sensitivity analysis

The Fund is exposed to the risk that the fair value or future cash flows of its financial instruments will fluctuate as a result of changes in market interest rates.

The sensitivity analysis reflects how changes in underlying interest rates affect the fair value of the financial instruments.

Fair Value Sensitivity Analysis

		Fair Valu	ue Sensitivity	to the interest	rate moveme	nt/shift	
	R'000s	R'000s	R'000s	R'000s	R'000s	R'000s	R'000s
Asset Class	-1%	-0.5%	0	0.5%	1%	1.5%	2%
Bonds	1 279 000	1 253 000	1 228 000	1 204 000	1 180 000	1 158 000	1 136 000

IRS	556 000	375 000	156 000	45 000	(105 000)	(248 000)	(382 000)
Cash	986 000	986 000	986 000	986 000	986 000	986 000	986 000
Net	3 127 000	2 920 000	2 676 000	2 541 000	2 367 000	2 202 000	2 046 000

Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Fund's activities.

Mechanism to mitigate operational risk include the following:

- appropriate segregation duties between various functions, roles and responsibilities
- · reconciliation and monitoring of transactions;
- · compliance with regulatory and other legal requirements;
- · documentation of controls and procedures;
- requirements for the periodic assessment of operational risk faced, and the adequacy of controls and procedures to address the risks identified;
- contingency plans;
- · ethical and business standards;
- risk mitigation

In light of Council's approval for the City to enter into a termination process with the current Fund Manager by mutual agreement, the City is assessing all risks that may arise in the transition phase with a view to ensure that any such risks are mitigated in a manner that does not negatively impact the City.

Valuation of financial instruments

The Fund measures fair values using the following fair value hierarchy:

- Level 1: Fair values of financial assets and finacial liabilities are traded in active markets are based on quoted prices or dealer prices.
- Level 2: The fund uses widely regconised valuation models for determining the fair value of common and simpler financial instruments, or estimation. Observable prices and model inputs are usually available in the market for listed debt, exchange like interest swaps like use only observable market data and require little management, judgement and/traded derivatives exchange and simple over the counter derivatives like interest rate swaps.

57. DEVIATION FROM SUPPLY CHAIN MANAGEMENT REGULATIONS

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the Group Annual Financial Statements.

In terms of Section 36 (2) of the supply chain management regulation.

Details of Deviations

58. HEDGING ACTIVITIES

During the financial year 2010/2011, CJMM entered into an interest rate swap by exchanging the Nedbank R1 billion 3 months JIBAR rate + 280 bsp for an 11.66% fixed interest rate.

Swap Details

Trade Date: Settlement Date: 30 March 2011 29 March 2018

Nominal Amount:

R 1 billion

Fixed Rate:

11.66%

Payable:

Semi- annual

The cash flow hedge was ineffective for the year ended 30 June 2015 and it no longer met the criteria for hedge accounting as per IAS 39 par 88. The City of Johannesburg has therefore discontinued applying hedge accounting.

59. RELATED PARTIES (continued)

These commitments with related parties are also included in note 43

60. CHANGE IN ESTIMATE

Property, plant and equipment

The useful lives of certain property, plant and equipment have been reviewed and reassessed by management during the current reporting period to reflect a more accurate pattern of consumption expected to be derived from these assets. The changes were made prospectively from the beginning of the reporting period. Depreciation is accounted over the remaining useful lives.

Property rates

The change in estimate amount included in revenue are due to change in property values, implementation of appeal board decisions, property subdivisions and consolidations and property categories.

Traffic fines

The amount relates to traffic fines accounted for as invalid in the previous year, this was due to these not being posted to traffic offenders within the prescribed period. These fines were subsequently collected by JMPD in the current year. The change in estimates for fines amounted to R15 496 877.50 (2017: R22 459 678).

62. CASH MANAGEMENT

Since 2013 financial year, Transport department within City of Johannesburg had cash losses due to alleged fraudulent activities and theft amounting to R8 033 000 (2018: R15 162 000). These losses incurred led to monies which were never credited into the City's bank account. Management is in the process of prosecuting personnel alleged to have undertaken fraudulent activities and/or have been negligent in the execution of their duties. Cases have also been opened with the SAPS with a view inter alia to recovering the monies. Investigations are almost complete and based on the outcome of these investigations actions have already been taken and will continue to be taken to improve controls and hold the relevant parties accountable. The loss is included under general expenditure.
